

Personalisation Printer Step by Step

Customer

1. Scan the QR code and open the link
2. Select device brand and model
3. Upload and position the image
4. Tap Save & Upload
5. Enter email and accept T&Cs

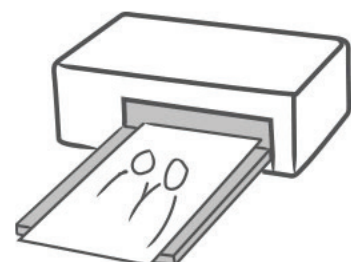

The customer then receives a QR code and an 8-digit code by email

Making the Print

1. Open the tray, remove the protective layer, and load paper (exposed side up)
2. Close tray
3. On the sidebar menu, select Back Skin Image
4. Scan the customer's QR code with the side camera or enter the 8 digits
5. Select retrieve image
6. Always confirm the design with the customer before printing
7. The Smartshield machine will now search for the printer
8. When the printer name appears, select connect
9. Select Print to send the image to the printer
10. Wait for the print to complete. It passes through the printer 4 times

Store Staff

Adding the Laminate Sheet

1. Peel away the small strip at the bottom of the laminate sheet to expose the adhesive strip
2. Align the sheet over the print. Tip: position the sheet on one side and gently place it onto the print
3. Ensure the adhesive strip is in full contact with the print
4. Raise the laminate layer with one hand and release the second layer
5. Use the squeegee to apply the laminate layer

Making the Cut

1. Select Next
2. Insert print (portrait position, following the arrows)
3. Select Next
4. Select Cut

Performing the Install

1. Prepare the device by cleaning it
2. Remove the print cutout from the print paper
3. Spray the back of the phone and the back of the print
4. Align the print on the device and perform a wet install
